## **01. Executive Summary**

The Educational Publications Department had been established as a separate expenditure unit under the Ministry of Justice by the Extraordinary Gazette notification dated 27 March 1965, and reestablished as a department under the former Ministry of Education and Culture by an Extraordinary Gazette notification dated 30 September 1966. The role of providing free school textbooks to Sri Lankan children from the year 1980 had also been assigned to the Department by making free education more meaningful.

Accordingly, the Educational Publications Department under the Ministry of Education fulfills the task of providing free school textbooks required by students studying in government schools and government-affiliated schools and pirivenas, and preparing supplementary reading books and learning aids related thereto.

The main objective of this audit is to evaluate the performance of the textbook printing and distribution process, which is the main role of the Educational Publications Department.

Although attention has been paid to the provision of free textbooks, supplementary reading books and the compilation of learning aids in fulfilling the role related to the Educational Publications Department, the matters, such as not considering the 3,422,642 copies of undistributed and remaining stocks of books and the reusable books worth Rs.309,626,625 in the schools and centres related to years 6, 7, 8 and 9 in the year 2021, in deciding the printing order, delays in the distribution of textbooks, 494,428 books worth Rs.140,439,113 had remained in the warehouse for a period of 05 to 12 years as at 31 December 2022 owing to not considering about remaining stocks in printing the additional books, there had been variations between balances of book stocks related to supplementary books and physical stock balances, there had been no facilities to store books, there had been no computer system for book shops, etc. were observed..

Matters, such as incurring of Rs.1,089,546 on the workshops conducted to select a children's book for printing under the General Education Modernization Project, and it had not been possible to select even a single children's book suitable for printing in connection with that workshop, action had been taken to produce 490 digital learning support videos by spending Rs. 25,473,288 for e-thaksalawa in the year 2022 without

considering that the average number of views of certain videos had been as low as 150, out of the 431 videos that had been uploaded to the web server of e-thaksalawa in the year 2022, of the 551 digital learning support videos produced by incurring Rs.27,007,620 in the year 2021 for e-thaksalawa programme were observed. Accordingly, it was possible to identify that the provision spent annually by the government for 42 years have not been spent economically at various times owing to other matters observed during the audit including these matters.

It is recommended to obtain accurate data about undistributed books in distribution centers and schools in deciding the quantity of books to be printed by taking the above matters in to consideration, maintain a computerized information system for regular stock maintenance, provide many usable old books as much as possible for requests made for supplementary books, take steps to encourage children to reuse books for grades of 6, 7, 8 and 9, take steps to accurately determine the number of students studying each subject, take steps to minimize the delay in receiving textbook orders, take steps to provide school textbooks to children before the start of the first term of schools, maintain the warehouse properly by ensuring the safety of the warehouse, to print supplementary books after considering the requirements, to operate the general education modernization project productively, to maintain stocks properly by using computer programmes for sales promotion centers.

## **02. Introduction**

### **2.1. Background**

The Educational Publications Department has been established as a super-graded department under the Ministry of Education to accomplish the national task of providing school textbooks free of charge to the children of the country to derive the benefits of free education and compiling supplementary reading books and learning aids connected thereto.

The role of the Educational Publications Department is to achieve the objectives of producing worthwhile, virtuous and intelligent citizens to the country by implementing the national policy of providing free textbooks by the government and by compiling and providing other aids such as the other books, workbooks, translation books, glossaries of terms, supplementary reading books, dictionaries, audio-visual equipment necessary for the education process, and by developing the quality of education.

#### **2.1.1. Mission, Vision, Objectives and Main Functions of the Educational Publications Department**

##### **(a) Vision**

Ensure equitable access to education through the provision of learning materials of distinctive pedagogical standards that keep abreast with international developments in education.

##### **(b) Mission**

Enhances the quality and value of education by implementing the free Textbook Scheme of the Government of Sri Lanka, progressively widening the range of available dictionaries, audio-visual study packs and other materials of high educational standards enabling to produce worthwhile and intelligent citizens with ability to contribute towards the development of the country.

##### **(c) Objectives**

- (i) Provision of school textbooks free of charge to students in grade 1-11 in government schools and private schools.

- (ii) Provision of school curriculum and additional knowledge to students through the production of supplementary reading books.
- (iii) Preparation of students for public examinations by printing questions and answers books.
- (iv) Provision of knowledge on syllabi to teachers by printing and distributing teacher's guides.
- (v) Provision of guidance required to the efficient learning related to the syllabi.

**(d) Key Functions**

- (i) Translating books approved for the use in primary, secondary and higher education.
- (ii) Production, publication, distribution and sale of the textbooks, glossaries of terms, dictionaries, and other books that are necessary for educational activities.
- (iii) Production, distribution and sale of learning aids, audio-visuals and other equipment.
- (iv) Encouraging the production of reading materials.

**(e) Administrative Activities of the Department**

The Department has been divided into nine main divisions namely Administration Section, Development Section, Production Section, Publications Section, Distribution Section, Finance Section, Internal Audit Section, Sales Promotion Section, and Information Technology Section for the convenience in administration.

## **2.2 Authority for Audit**

The audit was conducted under my direction in accordance with the provisions contained in Article 154(1) of the Constitution of the Democratic Socialist Republic of Sri Lanka and the provisions of the National Audit Act, No. 19 of 2018.

### 2.3 Audit Approach

The primary role of the Educational Publications Department is to print and distribute textbooks free of charge to government and government-affiliated schools, and the provision of other supplementary books, translations, glossaries of terms, audio-visual equipment and other aids.

Not correctly identifying the amount of textbooks and additional books to be printed annually, failing to complete the procurement activities related to textbook printing and distributing the textbooks to schools in the stipulated time, etc. in the discharge of this fundamental role had been the basic facts for the basis of selecting this performance audit topic.

Accordingly, evaluation of the performance in determining the amount of textbooks required for schools annually and determining the number of supplementary books to be printed, carrying out procurement activities related to the printing of textbooks and supplementary books within the prescribed time frame, and distributing textbooks to schools within the prescribed period, etc. in the fulfillment of the fundamental role of the Educational Publications Department are the aspects covered by this audit.

### 2.4 Audit Objectives and Criteria

The main objective of this audit is to evaluate the performance of the textbook printing and distribution process which is the main role of the Educational Publications Department.

<b>Sub-audit objectives</b>	<b>criteria</b>	<b>source</b>
-----	-----	-----
(a) Evaluation determining the number of textbooks to be printed annually.	on Facts taken into account in deciding the number of textbooks to be printed annually	The letter of Commissioner General of Educational Publications No. EPD/DIS/01/2022/02/Audit dated 02 September 2022.
	<ul style="list-style-type: none"><li>• Stock balance at the beginning of the year for textbook requests from public schools, private</li></ul>	

school Assisted and special schools

- Requirement of textbooks for studies in Teachers Colleges, Colleges of Education and other Government Institutions

- Book balances in warehouse for immediate delivery in case of emergency

- Figures and data on reusable textbooks

- (b) Evaluation of the execution of the work related to the printing of textbooks and supplementary books within the stipulated time frame. Completion of procurement activities within the prescribed time frame in accordance with the procurement plan as per the Procurement Guidelines. Procurement Guidelines.
- (c) Evaluation of delivery of textbooks to schools within the stipulated period. Completing the distribution of textbooks to schools before the start of the first school term. Annual performance reports, action plan
- (d) Evaluation of storage of printed books. Arrangements have been made for safe storage of printed books. Annual performance reports
- (e) Performance Evaluation of the General Education Modernization Programme.
- Promotion of digital books in English and Mathematics as per DL 3 index. Project Annual Reports, Program Implementation Document..
  - Carry out the necessary activities for the compilation of digital learning aids.

## **2.5 Scope and Scope Limitations**

The audit focused on the printing of textbooks for the main subjects related to Grades 6, 7, 8, 9 regarding the year 2021 (Checking 1,283 order documents related to 736 direct distribution schools, 214 distribution centers and 283 distribution centers through divisional Education offices related to the 9 provinces of the island) and the printing, distribution and procurement of textbooks in relation to the years 2022 and 2023.

In preparing this report my scope was subject to the following limitations.

- i. Inability to check all textbook distribution centers due to limited human resources and time.
- ii. Absence of formal and updated data system.
- iii. Inspection of order documents only in relation to the 2021 academic year at direct delivery schools and delivery centers across the island

## **2.6 Audit Methodology**

### **2.6.1 Checking Documents**

- (i) Inspection of documents and books
- (ii) Decisions of the Cabinet of Ministers
- (iii) Official website of the department
- (iv) Departmental financial statements, performance reports
- (v) Procurement Guidelines 2006
- (vi) Gazette Notification dated 30 September, 1966
- (vii) Textbook order documents of schools and centers
- (viii) Stock books in stores and sales promotion centers

### **2.6.2. Other Methodologies**

- (i) Conducting discussions with relevant parties
- (ii) Physical examinations
- (iii) Analytical analysis of financial information

### **03. Detailed Audit Findings**

#### **3.1 Annual Textbook Requirement**

##### **3.1.1 Determining the number of textbooks to be printed annually**

According to the letter No. EPD/DIS/01/2022/02/Audit dated 02 September, 2022 of the Commissioner General of Education, the amount of textbooks to be printed annually based on criteria such as the stock balance at the beginning of the year, the need for textbooks in schools, the need for textbooks for sales promotion centers, the need for textbooks for educational activities in teachers' colleges and other government institutions, the need for textbooks for disasters and other emergencies are determined by a departmental committee for deciding the number of textbooks, It was examined in the audit in respect of determining the need for textbooks in Sinhala, Tamil and English mediums in the main subjects of Sinhala / Tamil language and literature, English language, Buddhism, Mathematics, Science and History in relation to the Grades 6, 7, 8 and 9 in the year 2021 and the determination of need of the textbooks in the years 2022 and 2023 as well. The following points were observed here.

- (a) In the year 2021, 3,422,642 copies of books worth Rs. 309,626,625 which were undivided and could have been reused in schools and centers in relation to Grades 6, 7, 8, 9 had not been taken into consideration in deciding the printing order. The amount was observed to be 34 percent of the cost of printing textbooks for the main subjects in Grades 6-9. (Annex 01)
- (b) While printing the textbooks related to the year 2021, the balance of the textbooks remaining in the warehouse after the distribution of the textbooks related to the year 2020 should be taken into consideration. A large variance was observed between the textbook balances obtained from the Pitipana A, B and C warehouses before the textbooks for the year 2021 were received in the warehouse and the original warehouse stock balance that the department had taken into account when printing the textbooks for the academic year 2021. Thus, it is problematic whether the department had used the correct data while printing the books. (Annexure 02)

- (c) The textbook printing requirement for the academic year 2022 had been decided by a committee and due to the delay in getting the order documents online, the book requirement for the year 2022 had been decided based on the order documents of the year 2021 and acted accordingly.
- (d) The textbook printing requirement for the academic year 2023 had been done on the basis of orders received through online mode. A variance of 444,112 books was observed between the initial stock balance of 237,500 books taken into account by the department in determining the printing requirement and the initial stock balance of 681,612 books provided by the warehouse to the audit.

### **3.1.2 Additional Requests for Books**

A large number of books had been requested from the schools and centers as additional demands while submitting the order documents. The Educational Publications Department should advise the principals to reuse the books that are suitable for use.

Due to not giving instructions to use old books in a suitable condition, 532,452 copies of books worth Rs. 46,082,884 for main subjects of 6, 7, 8 and 9 grades in the year 2021 had been given to the schools as additional requests. Thus, it was observed during the audit that the government will have to bear a huge expenditure due to the increase in additional requests. (Annexure 03)

### **3.1.3 Awareness about reuse of textbooks**

All the Principals and Parivenadhipathi Theros had been informed regarding the reuse of the used books by the students in the Departmental Circular No. 2017/01 of the Secretary of the Ministry of Education, dated 23 March, 2017 and bearing number EPD/M/04/2017/04/project. The said circular had been issued with the aim of creating an attitudinal change to use the textbooks provided free of charge to the students with caution, to stop wasting a large stock of reusable books for nothing and to encourage the students to contribute to the preservation of the national wealth.

Without encouraging and following up the school system to act according to that circular, 10,643,000 copies of books worth of Rs. 905,895,880 required the 100

percent for the main subjects for the 6, 7, 8 and 9 grades in 2021 and 7,118,900 copies of books worth Rs.606,637,733 had been printed by the department in the year 2022.

In the background that the use of textbooks in the year 2021 was at a minimum level, for the academic year 2022, the department had arranged to print 7,118,900 copies of books for the main subjects of 6, 7, 8 and 9 grades at a cost of Rs. 606,637,733.

#### **3.1.4 Disposal of unusable books**

Books worth Rs. 312,831,071 were removed from use due to changes in the syllabus and various types of damage according to two decisions of the Cabinet of Ministers in the year 2008 in relation to advance accounting of book printing and distribution under the Subject No. 21302 of the Department of Educational Publications and this value had been removed from the accounts of the year 2017. It had been shown as a value of unusable books is Rs. 93,420,366 according to the final accounts of the department from 01 January 2018 to 31 December 2022 again.

It was observed during the audit that due to not determining the need for textbooks correctly, not taking care of the demand in the preparation of additional books, lack of proper standard storage facilities and not taking care of the change of syllabus, the books printed by the department had to be misused.

### **3.2 Printing of textbooks**

#### **3.2.1 Procurement activities related to textbook printing for the year 2023**

The procurement work for printing the required textbooks for the year 2023 had started on 07 March 2022 with the appointment of the technical evaluation committee and the department had taken nearly ten months to complete the procurement work. Accordingly, for the year 2023, the Educational Publications Department had entered in to contracts with 20 printing companies from 20 to 28 December 2022 and with 02 printing institutions on 11 January 2023. A period of Three months had been given to printing institutions from the date of entering in to the contract to print the books and deliver them to the warehouse as it takes considerable time to composing letters, submit the first second and third proofs, submit 10 advance copies and print and bind the total number of copies before printing the books. However, 3,361,400 copies of textbooks had been given to the warehouse by 30 January 2023 from 14 printing institutions. (Annex 04)

Over the past many years, the audit has observed that it is not a practical situation to deliver textbooks to the warehouse before a month has passed after entering in to the contract to print the books.

### **3.2.2 Placing printing orders to the State Printing Corporation**

The approval had been granted by the decision of the Cabinet of Ministers bearing No. CP/22/0707/506/303 dated 14 June 2022 to award the contract of printing of 45 percent of the school textbooks distributed free of charge to school children by the Educational Publications Department for the year 2023 to the State Printing Corporation outside the open procurement process. Accordingly, the State Printing Corporation had been awarded the contract at the contract value of Rs. 5,081,708,270 for printing 14,704,300 copies of textbooks in 93 subjects for the year 2023. The following observations are made in this regard.

- (a) In the discussion held between the State Printing Corporation and the Department of Educational Publications on 02 February 2022, the General Manager of the Corporation had said that since the Corporation is suffering from an acute shortage of working capital, if the order of the Department was given in the first quarter of the year, it was possible to solve the problem. At a time when the corporation was facing acute working capital problems and was facing difficulty in providing necessary funds for textbook printing, the State Printing Corporation had been approved to print 14,704,300 copies of 93 types of textbooks.
- (b) The first school term of the year 2023 had started on 20 March and before the start of the first school term, only 697,700 copies of textbooks had been received from the State Printing Corporation to the warehouse. Accordingly, the Corporation had failed to deliver 14,006,600 copies of textbooks that were given to the State Printing Corporation to be printed before the start of the first term of school.
- (c) The Educational Publications Department had informed the Corporation to print and deliver the textbooks given to the State Printing Corporation to be printed before 18 April 2023. In a situation where the Corporation had been informed like that, the Corporation had informed the Department on 01 April 2023 that 30 of the 93 types of textbooks given to the corporation for printing

could not be printed and delivered by 17 April 2023. After that, approval had been granted by the Cabinet Decision No. 23/0681/607/057 and dated 20 April 2023 that the 30 types of textbooks that could not be printed by the State Printing Corporation were to be printed by private presses subject to the recommendation of the Standing Procurement Committee appointed by the Cabinet of Ministers.

- (d) Moreover, the Standing procurement committee appointed by the Cabinet of Ministers had decided on 18 April 2023 that focusing on the factors of printing capacity of these 30 types of books, past performance, labour capacity and financial ability, those books had been handed over to 22 private printing houses at the same prices approved by the State Printing Corporation for printing the book. Furthermore, the Standing procurement committee had recommended that the quantity of 4,048,100 copies to be given of these 30 types of books should be printed and delivered to the warehouse before 10 May 2023.

Due to the difficulty and impracticality of printing textbooks in less than a month after the printing order was given, by 10 May 2023, the said Printing Presses had failed to print and deliver 4,048,100 copies of these 30 types of textbooks to the warehouse.

Accordingly, the department had failed to distribute these textbooks to schools all over the island until 02 months after the start of the first school term of the year 2023. Also, 13 types of textbooks related to the Grade 8 had been included in these 30 types of books and the children studying in the Grade 8 in schools across the island did not receive the textbooks until 02 months after the school started. In this way, it was observed that the attention of the department was not focused on the adverse effect of providing school textbooks to school students late. (Annex 05)

### **3.2.3 Printing Additional Books**

Compilation of additional reading books required enhancing the knowledge with the view to producing moral and knowledgeable people productive for the country, and printing books with questions and answers to make the students ready for the public examinations are a main function of the Educational Publications Department. The

requirement of new additional books is determined with the intervention of the officer in charge of the respective subject under the Development Division of the Educational Publications Department, and a number of copies required to be printed is determined by a statistical committee. 108,000 copies related to 22 categories of additional books worth Rs. 19,536,100 relevant to the year 2022 had been printed. Following observations are made in this connection.

- (a) Even if the supplementary reading books had been printed so, 494,428 books worth Rs. 140,439,113 existing from a period from 05 – 12 years without being sold had remained in the store even as at 31 December 2022 due to not identifying the requirement correctly or not making the children aware through a promotional method or making prints exceeding the quantity. (Annexure 06)
- (b) While adequate stocks of books to be sold were remained in the store, the books had been re-printed and thereby 36,291 books worth Rs. 3,666,366 have remained in the store. (Annexure 07)
- (c) Since an internal control system regarding the additional books was not implemented, the instances; where the physical stock balances of additional books existed as at 31 December 2022 and the stock book balances as at the said date had been different from each other, were observed. (Annexure 08)
- (d) Also, the total number of stocks issued in relation to each month has been reported in the stock books as a total and it was observed that the place; to which those books had been issued, had not been mentioned in the stock books.
- (e) As the number of copies that need to be printed from each book had not been correctly predicted and the books had been printed in great quantities to reduce the unit cost of the printing, the stocks had been piled up for a long period causing the books being damaged. Also, due to the change of the syllabuses, 403,719 copies of additional books belonged to 86 categories of books at a value of Rs. 73,055,281 had been removed from use in the year 2022. (Annexure 09)

### 3.2.4 Braille Printing

Increasing the effectiveness and efficiency of printing and distributing textbooks in Braille mode from Grade 1 to Grade 11 with a view to making a moral and knowledgeable visually impaired child an asset to the nation is the main objective of the Braille Press, which operates under the Educational Publications Department. Accordingly, the primary responsibility and the role of the Braille Press is to receive orders from the Special Schools and Special Units of the Schools that need Braille textbooks across the island and print and distribute the Braille textbooks from Grade 1 to Grade 11.

27 Special Schools and 868 Special School Units are operative throughout the island for visually impaired children and 223 visually impaired students are educated in those schools in the year 2023. The Braille Press is functioning under a Deputy Commissioner and two Graduate Project Assistants and three Development Officers are engaged therein to prepare Braille books. A senior press operator is working there for book printing. A Development Officer is in charge of other administrative functions of the Braille Press and four Service Assistants are working in respect of book distribution. The following particulars were observed in this regard.

- (a) At present, only Senior Printing Machine Operator is working in braille press to carry out the activities of printing braille books and he is to retire in the year 2029. However, it was observed that there was no plan in the Educational Publications Department to recruit a person knowledgeable about braille book printing or to train a person in the press.
- (b) Even if the braille press has 04 braille box printers for printing books, 02 printers from those are out of function. Further, a small amount such as between 40 and 60 copies of books can be printed by these 02 printers per day. Due to the inability of these printers to print a large number of books at once, the same machines are in operation for most of the day. Consequently, it was observed that the machines were often out of function making it impossible to carry out the printing works efficiently.
- (c) A total of 8,702 Braille textbooks had been requested by 39 Special Schools and Zonal Education Offices throughout the island for the year 2023, and only 4,663 books could be distributed by 14 July 2023 and it is a 53 percent of the

total number of books requested. Accordingly, by the end of the first school term of the year 2023, the department had failed to distribute the books to schools that needed Braille books. Furthermore, the 1,350 Braille books requested for the Eastern and Northern Provinces had not been provided even 14 July 2023.

### **3.3 Distribution of the Printed Textbooks**

#### **3.3.1 Distribution of the Textbooks – Year 2021**

Although the textbook distribution activities for the academic year 2021 had fully been completed by 31 December 2020, a stock of 4,761,461 textbooks worth Rs. 593,839,740 belonging to 128 categories of textbooks exceeding the stock balance of 20,000 had remained in the store by 31 January 2021.

#### **3.3.2 Textbook Distribution – Year 2022**

The first school term of the year 2022 had started on 18 April and the textbooks had been distributed to schools until December 2022. The number of textbooks distributed from Grade 1 to Grade 11 from May to December of the relevant year is 22,082,941. Even if the Educational Publications Department should take measures to provide the necessary textbooks for schools before the start of the first school term, The Educational Publications Department had failed to distribute 22,082,941 copies of the total 32,831,750 textbooks printed for the year 2022; i.e. 67 percent of the total textbook copies, to the schools on time before the start of the first school term of the year 2022.

#### **The textbooks distributed in the year 2022 with delay**

<b>Month</b>	<b>Pitipana A Stores</b>	<b>Pitipana B Stores</b>	<b>Pitipana C Stores</b>	<b>Total</b>
May	-	68,027	-	68,027
June	886,201	47,425	121,418	1,055,044
July	1,456,899	385	263,080	1,720,364
August	1,140,058	69,271	260,294	1,469,623
September	994,188	33,404	221,456	1,249,048
October	2,624,387	12,283	724,920	3,361,590

November	4,560,685	10,706	1,428,292	5,999,683
December	5,649,609	5,005	1,504,948	7,159,562
				<u>22,082,941</u>

### 3.3.3 Textbook Distribution – Year 2023

The first school term of the year 2023 had started on 20 March 2023 and the textbooks should be distributed to schools throughout the island before the start of the first school term. However, it was observed that all the textbooks that were given for printing for the year 2023 had not been printed and provided to the warehouse before the scheduled date. Further, after the receipt of these books to the warehouse, it takes extra time to inspect the quality and distribute those to schools all over the island and it was observed that the Department had not paid attention to the distribution of textbooks to all schools in the island before the start of the first school term in the year 2023. (Appendix 10)

### 3.4 Storing the books

#### Pitipana Book Store Complex

Pitipana Book Store Complex has been located adjacent to Homagama Pitipana main road. This store complex consists of 03 stores namely A, B and C. The books had been stored as textbooks in Store A and C and the additional books in Store B. The following particulars were observed during the physical inspection of Pitipana Book Store Complex.

- (a) The necessary steps had not been taken by the Department to erect a safety fence or a wall to separate the store complex from the main road. Because of this, any outsider was able to enter the store premises without any obstacle. Also, it was observed that the vehicles belonged to outside people are parked near the Pitipana C Store which could be a threat to the safety of the store, and a CCTV camera system had not been installed to cover the entire book store complex including Pitipana A, B and C Stores.
- (b) About 60,000 handbooks called "My Meals Book" which were given to be distributed to school children by the Ministry of Health remained in Pitipana A warehouse for almost 04 years without being distributed to schools.

- (c) There was not a separate office room for the office works in Pitipana "B" store, and a corner of the store itself had been reserved for the said purpose. When the office proceedings are done in the store where the employees are always around, it was observed that any person has the ability to access the stock of books and the computer system.
- (d) It was observed that 5,307 copies of Grade 10 Entrepreneurship Studies English medium textbooks stored in Pitipana "B" store were stored in one place for a long time and the books were stuck to each other and became unusable. It was observed that printing textbooks without identifying the annual textbooks requirement causes the textbooks being stored for a long time.

- (e) A large number of additional reading books; printed for sale in the bookshops under the Educational Publications Department and discolored, termite-eaten and decayed at present to the point of being unusable, had been stored on the ground floor of Pitipana "B" store. Also, in the store premises, the additional

reading books had been packed from place to place in an irregular manner allowing the books to be damaged.

(f) The lights, X Source Fan installed in Pitipana "C" store had been in inactive condition for a long time, and the birds had entered the store premises and made the place dirty in a way of being harmful to the textbooks, and the department had not taken steps to proceed with necessary activities in this regard.

### **3.5 General Education Modernization Project**

#### **3.5.1 Promotion of digital books**

The General Education Modernization Project (GEMP) is implemented under the aids of World Bank since 2019 to 2024. This project implemented under the aids of World Bank has been provided the indices expected to be achieved under this as per the project reports created among the Ministry of Education and the representatives of the World Bank. Accordingly, in accordance with DL3 Index attached with the release of the provisions allocated to the Educational Publications Department, the promotion of digital books for the subjects of English and Mathematics should be carried out. As per said index, the promotion of digital books for English and Mathematics subjects had to be performed for Grade 06 and 10 in 2019 and Grade 07 and 11 in 2020.

An expenditure of Rs. 01 million and Rs.15 million had been planned for the production of a book which supports for social integration through the education in 2019 and 2020 respectively. An amount of Rs.1, 089,546 had been spent by the Department in 2019 for the payment of the allowances for the resource persons and the officers of the department participated to the workshops conducted for the selection of children's books written by various authors for the printing. .

Likewise, the workshops had been conducted in relation to selection of a children's book for printing by incurring a huge amount and the department had decided that even one copy out of 64 scripts submitted by 36 authors who had been undergone the survey was not appropriate. Accordingly, an amount of Rs. 1,089,546 incurred for the workshops conducted for the selection of a children' book for printing had become an idle cost.

The Department had decided to write and publish a book by an author who had participated for such workshops after it was unable to select a book for printing from the workshops held in this manner and an amount of Rs. 5,759,018 had been incurred for that and 155,475 book copies and 73,475 book copies had been printed in Sinhala language and Tamil language respectively.

The action had been taken by the Department to purchase Laptops, Computers and UPSs by incurring a cost of Rs.6, 697,455 in contrary to the indices in relation to the

implementation plan of GEMP 2019-2024 and release of the provisions of the agreement of World Bank.

### **3.5.2 Supply of Digital Learning Aids**

The Educational Publications Department had commenced to supply the digital learning aids for the school children in 2020 with an objective of promoting the student learning performance levels and promoting the higher learning skills in students by General Education Modernization Project implemented with a goal of developing the quality of the general education. The following observations are made with regard to this.

- (a) 551 digital learning aid videos had been produced by incurring a cost of Rs. 27,007,620 in 2021 for e-Thaksalawa programme by utilizing the funds of Normal Education Modernization Project and the action had been taken to upload 431 videos out of it to the web server of e-Thaksalawa in 2022. The average watching times of a one video uploaded likewise was 150 which was in very low level and irrespective of that, the Department had taken measures to produce 490 digital learning aid videos for e-Thaksalawa by incurring a cost of Rs. 25,473,288 in 2022 and only 420 videos had been uploaded to the web server of e-Thaksalawa.
- (b) Due to arisen of issues in relation to the Copy Right of these videos supplied by the department, only 90 videos could be uploaded to the You Tube Channel of e-Thaksalawa. Owing to inability of uploading the videos to the You Tube Channel in this manner, there is no possibility of observing the watching times of digital learning aids videos in relation to each subject and it was inconvenient to obtain the understanding of the productivity of such videos through that. Furthermore, the Educational Publication Department had failed to produce the digital learning aid videos with high quality without issues related to the Copy Right by using competent resource persons with the subject knowledge.
- (c) No action had been taken by the Department to select the resource persons after identifying the qualifications and criteria to be prevailed for the duties to be performed by them in selection of the resource persons for the production

of these digital learning aids videos. Moreover, there was no transparency in the methodology used for the selection of external resource persons also.

**Number of resource persons participated for the workshops conducted in 2021, 2022, 2023 and the total payments made within the said years**

<b>Year</b>	<b>Number of resource persons participated for the production of digital learning aid</b>	<b>Total payments made within the year for the resource persons Rs.</b>
2021	399	28,132,589
2022	298	25,253,559
2023	186	3,283,112

- (d) The defects commonly observed with regard to the production of the digital learning aids are non-preparation of pre plans related to production of digital learning aids, non-exchange of the information pertaining to the upload of digital learning aids to the web server of E Thaksalawa of the Ministry of Education with the ministry, not taking action as instructed in this regard by the ministry, not taking action to produce the videos having obtained the data on subjects mostly required to obtain the knowledge, not carrying out follow-up on that having uploaded the videos related to E Thaksalawa by the staff officers who had been appointed to co-ordinate the production activities of digital learning aid for each subject and not carrying out a self-evaluation on the productivity of the video lesson series by the department.

**3.5.3 Compilation of book for making aware the students in Grade 12, 13 on Reproductive Health**

Even though the approval of the Commissioner General of Educational Publications for the compilation of an electronic reading manual on Reproductive Health for the children in Grades 12 and 13 under the awareness program on Reproductive Health belonging to the subject scope of School Health and Nutrition Division of the Ministry of Education, the action had been taken by the Department to prepare it as a printed book. The following observations are made related thereto.

- (a) Since the school children more closely work with the technology presently, it was observed that there was a possibility of distributing this book among the

school children in more expeditious and convenient manner if it had been compiled as an electronic book instead of preparation this book as a printed book. The Department had to incur a printing expense of Rs. 7,258,500 for printing 15,000 copies of book owing to taking decision to compile this electronic reading manual as a printed book.

- (b) No plan had been prepared by the Department for the distribution of this book such as whether the Resource Book on Reproductive Health compiled spending more than 02 years is provided to the libraries of schools or whether is provided to the outlets as an additional book. Similarly, 15,000 copies of this book printed had been received to B stores in Pitipana on 26 December 2022 and the stores book balance was 2,800 on 14 July 2023.

Instead of determination the copies to be printed of Reproductive Health Book which had been decided to compile with an objective of making aware the students in Grade 12 and 13 of the schools by a committee formally appointed, it had been decided to intermediate only a single officer. As per the said decision, 2,694 copies had been allocated for the distribution of the Colleges of Education, Teachers Centers, Teachers' Colleges, resource persons and for sale in addition to the schools.

### **3.6 Other Observations**

#### **3.6.1 Transfer of Lands**

Urban Development Authority holds the ownership of the land located in Pitipana where the Text Book Stores Complex has been constructed, which is under the supervision of the Educational Publications Department and action had not been taken to have the legal ownership of that land transferred in the name of the Educational Publications Department and this land had been accounted at the value of Rs.92,145,416.

#### **3.6.2 Sales Promotions Centers**

06 Sales Promotions Centers are operated under the supervision of the Educational Publications Department. These Sales Promotions Centers are operated at Maradana

Viddyodaya Pirivena, Narahenpita Economic Center, Issurupaya, Maharagama National Institute of Education, Meepe Teacher Training Center and Jaffna Central Collage. It is possible to purchase school text books, additional reading books, translated books, glossaries and past papers at these centers.

All these Sales Promotion Centres sell Departmental publications, supplementary reading books and Teachers' Guides and the school text books and School textbooks are also sold in Maradana, Isurupaya, Meepe and Jaffna centres.

The Department had been able to collect an income of Rs.109, 380,537 in the year 2022 by selling these books. The Department should work towards improving the quality of their service offered to those customers who are interested in Departmental publications. The following observations are made in this regard.

- (a) Action had not been taken to record in a book of stocks the daily receipts and issues of book stocks and due to not taking action to update the stock receipts and issues using the software, it was not possible to identify the amount of available physical balances. Accordingly, there was no sound internal control procedure for stock control at these selling promotions centers. It was observed at the audit that, non-availability of sufficient number of employees, non-availability of space for storing books, non- existence of proper procedure for the safety of Sales Promotions Centers, were the common issues of all Sales Promotions Centers.
- (b) The following special observations were made at the checking of the Issurupaya Sales Promotion Center.
  - (i) At the physical verification of goods carried out on 05 June 2023 related to a sample of 50 types of books, a shortage of 220 books valued at Rs.88,270 and an excess of 1262 books valued at Rs.231,080 were observed (Annexure 11).
  - (ii) As per the physical verification of books carried out by the Stock Survey Committee, a shortage of 649 books valued at Rs.93,019 was observed as at 31 December 2022. (Annexure 12)
  - (iii) Although a computer programme had been introduced related to reporting stocks at Sales Promotion Centres, it has not been

implemented effectively and the stock balance as at 15 May 2023 had taken minus values. (Annexure 13)

### **3.6.3. Transfers of the Officers of the Department**

As per Chapter III of the Establishments Code and Chapter XVIII of the Procedural Rules of the Public Service Commission, published in the extra ordinary gazette No. 2310/29 dated 14 December 2022 of the Democratic Socialist Republic of Sri Lanka, the officers/ employees in the public service who complete a long period in a single work place are subject to being ransfered. However, it was observed that 22 officers of the Sri Lanka Education Administrative Service and 08 officers from other services still remain in the Department even though they have completed more than 08 years of continuous service.

#### **04. Recommendations**

- 4.1. When deciding the number of books to be printed, action should be taken to obtain correct data on the undistributed books available in Distribution Centers and schools.
- 4.2. Computer information system should be operated for the correct maintenance of proper stock balances.
- 4.3. Taking action to give used old books worthy of reuse for additional requests for books.
- 4.4. Encouraging students of grades 6,7,8 and 9 to reuse books and getting the Provincial Directors to instruct principals in this regard.
- 4.5. Joining with the Ministry of Education, taking action to correctly decide how many students follow each subject. For that, obtaining information from the school level and maintaining a proper computer system up to date.
- 4.6. Take action to minimize delays caused in placing orders.  
  
Taking action to swiftly carry out procurement activities related to annual text books printing and carrying out distribution of text books without delay.
- 4.7. The Education Publications Department should make arrangements to provide school textbooks to the children before the start of the first term and give instructions to the principals to collect the textbooks from the children and distribute them systematically.
- 4.8. Take action to ensure the safety of the stores and maintaining it properly.
- 4.9. Take action to immediately recruit a braille printer for the purpose of braille printing. Taking action to efficiently carry out printing activities or taking speedy action to discuss with the Ministry of Education to design proper printing methods that will be suitable the new world order.
- 4.10. In the printing of new additional books, take action to print books only after looking at the real needs of children. Action should be taken not to print books when they remain available in the stores.

- 4.11. Take action to call for explanation from officers who should be responsible for incurring money without a proper plan under General Education Modernization Program.
- 4.12. Taking action to discuss with the Urban Development Authority and have the legal ownership of the land wherein located the Pitipana text books stores complex, transferred in the name of Education Publication Department.
- 4.13. Action should be taken to use the computer system in Sales Promotion Centers, maintaining stocks in a proper way, following systems for the safety of books, creating sufficient storing facilities in those centers and recruiting sufficient number of employees.
